A NEW COLLECTION FROM
BN WALLCOVERINGS

Inspire is clean and contemporary. **Skylines** and **skyscrapers, urban living** and modern **architecture...** these are the influences behind this collection.

Our design studio began by mixing textured layers with smooth metallic inks, and then developed more effects using matt and gloss finishes. The clever play of light and shadow on the various surfaces fires the imagination.

Already well known and respected in the interior design world, BN Wallcoverings are recognised for quality and beautiful design. Our studio works with internationally renowned designers, creating innovative, inspiring wallcoverings, which are sold worldwide

We're delighted to introduce our latest range Inspire, now available through carefully selected stockists throughout the UK and Ireland.

And we're already working on our next collections. Our team are busy researching trends, and talking to customers. Their concepts will then be interpreted into highly usable, desirable wallcoverings, suitable for homes, boutique hotels, restaurants and spas.

Inspire is created by BN's own in-house studio. It's clean and contemporary. Skylines and skyscrapers, urban living and

modern architecture; these are the influences behind this collection.

Our design studio began by mixing layers. Placing one pattern on top of another, they combined textures with smooth metallic inks, and then developed more effects using matt and gloss finishes.

These production techniques mean that light and shadow play on the various surfaces, creating subtle but clever three-dimensional effects.

Inspire is created using gravure and screen print techniques. The textured, tactile surface is further enhanced with embossing and specialist inks. The surface is a solid vinyl film supported with a fibre backing, so it's stronger, heavier, and far more durable than wallpaper.

Inspire is also paste-the-wall, so much easier to hang, and there's no messy trestle tables!
